

**9.9 G-450 with K8DT5616-V basket****9.9.0 Approval details**

Approved By

  
Civil Aviation Safety Authority Australia

Approval Date

27 MARCH 2019**9.9.1 General Information**

Issue 1 of this supplement has 2 pages.

This supplement changes the equipment list for the G-450 after modification approved under Supplemental Type Certificate SVL503

Modification under STC SVL503 involves the replacement of the envelope flying wires to fit the K8DT5616-V basket and KLF2711-88 load frame variants.

STC SVL503 will only be applied to Kavanagh G-450 models covered by Type Certificate VL507

There are no changes to the limitations or operational data for the modified G-450.

**9.9.7.12 Equipment List**

The following table replaces the G-450 equipment list for the modified Kavanagh G-450 envelope.

**9.9.7.12.1 Envelope list****Table 7 - Envelopes**

| Model | Burner | Basket | Load Frame | GCW (Kg) |
|-------|--------|--------|------------|----------|
| G-450 | I      | H      | H          | 3700     |

Note: If a nomex scoop is fitted, this configuration will require a “G-525” scoop designed to fit the larger KLF2711-88 load frame.

Note: Re-configuration of the G-450 to use the standard equipment list requires replacement of the envelope flying wires IAW KAV-GEN-20-001.
